

Meet The Speakers

Professor Dave Newell BSc, PgCert, PhD, FRCC (Hon), FEAC

Dave holds multiple positions including Professor of Integrated Musculoskeletal Care and Director of Research at AECC University College and Senior Research Fellow at Faculty of Medicine, University of Southampton. Dave graduated from Plymouth

University with a PhD in Molecular Biology in 1986. The last 30 years has been spent teaching and researching in chiropractic institutions holding the position of Research Director in two other chiropractic programs in both the UK and Australia. He has an extensive and diverse portfolio of expertise and teaching in research methodology, critical thinking and the natural sciences as well as curriculum design, validation and accreditation of chiropractic programs. He has successfully supervised multiple students at Masters and Doctorate level with ongoing PhD students in collaboration with a number of UK based Universities. He has published extensively in areas relevant to musculoskeletal conditions in general and the chiropractic profession in particular. He is active across the profession both in the UK and internationally and was one of the founding authors of the International Chiropractic Educational Collaboration education statements, a rallying call for EBM Chiropractic programs internationally. He is also co-presenter on Chiropractic Australia's icarechirocast podcasts.

Dr Bobby Maybee DC

A graduate of Western States Chiropractic College, Bobby Maybee is an active clinician in Portland Oregon, United States. He has also founded the Forward Thinking Chiropractic Alliance, which began as a small social media group and has grown into a doctor and student centred content

company with over 7,300 active members. When not consumed with the world of chiropractic, he enjoys time in the outdoors and time with his wife, 5 children, 3 chickens, cat, and his best friend, Jett the Labrador Retriever.

Dr Stephen Perle DC, MSc

Dr Perle joined the inaugural faculty of the University of Bridgeport School of Chiropractic in 1991. He is a Professor of Clinical Sciences. After graduation from Texas Chiropractic College in 1983 he practiced specializing in sports chiropractic in New York City until 1991. Dr Perle

has published more than a half dozen textbook chapters and over 40 peer reviewed publications. He has been an associate editor of Chiropractic & Manual Therapies since 2008 and has been on the editorial board since the journal started in 2005. In 2004, he was honoured as the American Chiropractic Association's Academic of the Year and has twice received an ACA Presidential Leadership Award. He is the chairperson of ACA's Research Advisory Board. In 2018 he was the ACA's McAndrews Leadership Lecturer. Dr Perle is a fellow of the Royal College of Chiropractors and the International College of Chiropractors. He is also co-presenter with Professor Dave Newell of the Chiropractic Australia icarechirocast series of podcasts.

Associate Professor Peter Tuchin BSc, GradDipChiro, DipOHS, PhD

Peter was employed at Macquarie University for over 27 years and has just recently retired as Associate Professor. Peter's areas of interest and research include the relationship of posture with neck pain, headaches and migraine, chronic pain syndromes,

and the relationship of vertebral artery dissection stroke with chiropractic. Peter is a Past President of COCA, has over 60 papers published, and received

several international research awards. He also conducted one of the largest RCT's on chiropractic and migraine to date. Peter has also maintained private practice in chiropractic and has treated many patients over his 30 years in clinic. Peter was recently made a member of the WFC Disability and Rehabilitation Committee, which is an international committee with many prestigious members. Peter also received Life Membership of COCA in 2017, for 25 years on the National Executive.

Dr Andrew Shepherd BSc (ChiroSC), MChiro

Andrew has been in private chiropractic practice for over ten years. In recent years he has been exploring his interest in health care technology and its application, culminating in the creation of his health care web app Medechart, which was released in 2018.

Mrs Hazel Jenkins BMedSc, MChiro, MAppSc(MI)

Hazel is a Lecturer in Radiology in the Department of Chiropractic, Macquarie University. She is a chiropractor and holds a Master of Applied Science in Medical Imaging. Hazel has over 15 years of experience as a chiropractic clinician with

strong clinical interests in addressing recurrent or chronic musculoskeletal pain conditions. Hazel's teaching and research focuses on musculoskeletal radiology with an emphasis on appropriate use within clinical practice. She is currently completing her doctorate through the Department of Health Professions, Macquarie University, titled: 'The over-utilisation of imaging in the management of low back pain'.

Mr Christopher Daniel

Christopher is Program Lead of the Choosing Wisely Australia program, an initiative of NPS MedicineWise. Chris has worked on a range of quality improvement programs in primary care over the past 14 years including diabetes and cardiovascular disease management, cervical screening, mental health and drug and alcohol programs.

Dr Matthew Bulman BHS, MChiro

Matt is a 2011 RMIT graduate and chiropractor in Launceston, Tasmania. He has contributed to COCA and CA News since 2011 and had the pleasure to interview some of the profession's leading researchers. He currently works as an onsite healthcare provider with Work Healthy Australia and

coordinates social media for Chiropractic Australia. He has an interest in evidence-based practice, the biopsychosocial aspects of healthcare, and social media as it pertains to chiropractic practice.

Ms Sasha Aspinall BSc Hons (Chiro), BChiro

Sasha is a chiropractor and PhD candidate at Murdoch University, where she is studying pain sensitivity and the impact of spinal manipulation in people with low back pain. She has been teaching at Murdoch University since 2013, mostly in practical

skills areas, and continues to see patients in private practice. Her research and clinical interests include the effects of manual therapies, the evidence-based management of spinal pain, pain science, and pain education.
